

## About Environet UK Ltd

We are an established and respected specialist in Japanese knotweed and invasive plant removal working nationally in both the commercial and residential sectors. To support our growth across the UK we are looking for a motivated and enthusiastic individual to act as Site Supervisor for the London region, based in North London. The role is based on site day in day out, with occasional days at our Head Office in Send, Woking for training, maintenance, and administration tasks. The role also includes the requirement to work away from home occasionally on other Environet sites across the UK.

We are looking for a candidate with a minimum of 2 years' experience in the landscaping industry, ideally with existing knowledge of invasive plants, although full training will be provided for the right candidate.

Based in North London, you will be responsible for delivering residential knotweed and bamboo removal jobs and completing herbicide treatments across London and East Anglia. The role involves some manual work so a good level of fitness is required.

## Person Specification
